TESCO Reducer is the same specially formulated blend of aromatic solvents that is used to manufacture TESCO Crystal Seal .

TESCO Reducer should be used to clean tools, applicators, spray equipment and general cleanup of TESCO Crystal Seal.

TESCO Reducer being the same blend of solvents used in the manufacture of TESCO Crystal Seal it can be used as a thinner for spraying. Thinning can also be done in certain applications that require a reduced amount of solids. We recommend that thinning does not go beyond 2 parts TESCO Reducer to 3 parts TESCO Crystal Seal, this would drop the solids to less than 9%.

**WHAT TO WATCH FOR:** TESCO Reducer is **FLAMMABLE**. Keep away from heat and an open flame . Keep container closed. Use with adequate ventilation, proper respirator and avoid prolonged breathing or skin contact.
